

# HIGHTEN AI

The only platform that builds, deploys, and grows your SaaS

**Highten AI lets anyone describe a SaaS idea in plain English and get a complete, revenue-ready subscription business deployed in minutes.** Landing page, authentication, database, Stripe billing, emails, custom domain, and analytics. All configured and live from a single prompt.

## Problem

Millions want to start SaaS businesses but get stuck on infrastructure: databases, auth, payments, deployment, domains. Tools like Lovable and v0 generate apps but **abandon founders after launch**.

## What Makes Us Different

We don't stop at deployment. Every SaaS gets **full business intelligence**: MRR/churn analytics, customer health scores, dunning recovery, referral programs, and an **AI Business Assistant** that identifies at-risk customers and recommends growth actions daily.

## HOW IT WORKS

**1**

Describe your SaaS or pick a template

**2**

We generate and deploy everything: app, database, auth, payments, emails, domain

**3**

AI assistant helps you grow: churn prevention, revenue recovery, marketing plans

## MARKET

Over 30,000 SaaS companies exist today, growing **18% annually**. Millions more want to build SaaS but lack technical skills. At **\$35/mo** average, we need just **238,000 customers** for **\$100M ARR—less than 1% of addressable market**.

## TRACTION
