

# NEDIL AI

Real-time AI Voice Translation for Seamless Communication

## What We Do

Nedil is an AI-powered voice translation app that enables real-time, natural conversations between people who speak different languages. Simply **hand your phone to someone** who speaks another language, and Nedil handles the rest - translating both sides of the conversation with context-aware AI and natural-sounding voices.

## Key Features

- **Voice-First Design** Speak naturally, hear translations instantly
- **20+ Languages** Spanish, Japanese, Hindi, Arabic, and more
- **Cultural Tips** Real-time insights on local customs
- **Natural Voices** Human-like speech powered by ElevenLabs

## 6-Month Roadmap

Timeline	Focus Area	Key Deliverables
Month 1-2	Marketing Push	App Store optimization, social media campaigns, influencer partnerships, travel community outreach
Month 2-3	Photo Translation	Add camera support to translate signs, menus, and documents instantly
Month 3-4	Performance	Reduce latency by 40%, improve voice quality
Month 4-5	Language Expansion	Add 15+ new languages including Thai, Vietnamese, Korean, Portuguese, Dutch
Month 5-6	Enterprise Features	Team accounts, API access, custom voice training, analytics dashboard

## The Ask

We are raising **\$250,000** to scale marketing, expand language support, and enhance our AI capabilities.
